BRITISH PETROLEUM MAKE RECORD IN DRILLING THEIR LATEST WELL

Crew at No. 3 B Well Reach Top of Forty foot Oil Sand

The crew drilling the fifth well for the British Petroleum have made excellent time on this well and have reached the top of the forty foot sand which was encountered in Number three well. They are now waiting the arrival of the eight and quarter inch casing before drilling the formation from which it is expected they will secure production of a higher grade oil that is being produced from the other wells drilled west of this location. This well is only about forty feet away from number three well, in which a small core was taken below the casing, which was set at approximately 2258 feet one of the finest showings of saturated sand was obtained, this sand extended for a depth of forty feet but owing to the small size of the hole being drilled it was decided that it would be impossible to expect production from the well. At the time this core was obtained, several geologists and practical oil men who were present, expressed the opinion that a high grade of oil would be produced if a larger size casing could be set in this sand. This led the directors of the company to start the new well as close as possible to the original test hole. As records had been kept of the formation encountered in the first well it has not been necessary to take cores of the drilling, thus accounting for the good time made in getting the well down. It will take some time after the arrival of the casing before it will be practical to make a test of the sand, as it will be necessary to wait for two or three weeks for the cement to set after the casing is put in the well before the sand can be drilled out and a test made. Although good results have been obtained at numbers two and four wells, both of which have been producing oil for some time, it is generally understood that better results will be obtained by deeper drilling. These wells we understand are ready to be put on steady production as soon as satisfactory arrangements have been made for the marketing of the oil.

U.F.A. SUNDAY OBSERVED AT MCCAFFERTY

The U.F.A. Sunday was observed by the McCafferty local on June 21st, when Mr. E. Corbett of the Department of Extension gave a most appropriate address for the occasion.

At a concert given on the Monday night, a capital program was presented by local talent.

The chair, in the absence of the president Mr. Herbert Spencer, who is on a visit to the homeland, was ably filled by Mr. Roy Taylor.

The artists included Mrs. Lees, pianist, Mr. E. Corbett, Mr. W. T. Hays, premier tennor of Alberta, E. Swindlehurst, Violinist, Mr. and Mrs. Clendenan, Mrs. Wynne, Mrs. W. Kelly, Mrs. House, Mrs. R. Guy, and Mr. Davis, Humourist. Each item received an encore. The program throughout was delightfully rendered, and the crowded audience very much appreciated services given. A dance followed which brought to a close one of the most enjoyable of evenings.

EARL HAIG TO VISIT ALBERTA

Word has been received that Field Marshall Earl Haig will visit Alberta during his tour of Canada in July. It is also expected that Ramsey McDonald and Hon. Arthur Henderson, prominent British labor leaders, may visit the province this year.

Happy are those who don't want the things they can't get.

CRUDE OUTPUT HITS TOBOGGAN

Reports of crude petroleum production from all districts in the United States for the week ended June 6, show a decrease of approximately 34,000 bbls. daily when compared with the record of the preceding week. Complete figures for the week ending June 13 are not available but indications are that there will be a further drop of approximately 25,000 bbls. Since the first of the year there has been a decrease in the production of light oil crude of more than 100,000 bbls per day. Production of heavy oil has increased, largely due to the flood of petroleum from the Smack-over field in Arkansas. This field apparently reached its peak on May 25th with a production of 390,000 bbls. It has since dropped rapidly, due to the intrusion of salt water and the lessening completion of wells. Known producing area of the field will be drilled within the next 60 sixty days when it is estimated its production will not be more than 100,000 bbls. daily. Statisticians of the oil industry are now predicting that the daily production of crude petroleum in the United States by Aug. 1, next will be less than 2,000,000 bbls. This prospect of the rapid decline of production is responsible for recent advances in refined products and the posted prices of crude petroleum at the wells.—Inland Oil Index.

Wipe out your fear of death, and you enjoy life.

SPECIAL JOINT MEETING LOCAL U.F.A.s

A special joint meeting of local U.F.A.s was held in Airlie school-house, representatives from Edinglassie, Prosperity, Butze and Airlie being present.

Meeting called to order by W. J. Harris, chairman, pro tem.

Nominations for chairman were called for. Moved C. Miller—G. Gibb that J. Craddock be chairman. Carried.

Moved C. Miller—W. Petrie that W. Johnson be Secretary. Crd. present as follows:

Mr. Johnson, Edmonton, for U.G.G.

Mr. McCluskey of Chauvin for Consumers Cordage.

Mr. Collette Chauvin for Massey Harris

W. O. Harris for International. Mr. Scott of the Plymouth, not present.

Moved C. Miller—W. J. Harris that twine representatives have 15 minutes each to address house. Carried.

Moved W. J. Harris—P. Manson that G. Gibb be delegate for Airlie. Carried.

Moved F. Carrell—E. Conschene that W. J. Harris be a Delegate for Airlie.

The following are the delegates from each local:

Edinglassie—P. H. Perry; W. Petrie.

Prosperity: C. Miller; B. Hassall.

Butze: L. Fahner; T. Scott.

Airlie: W. J. Harris; G. Gibb.

Moved P. H. Perry—C. Miller that delegates adjourn for ten minutes. Carried.

Meeting adjourned by chairman Craddock.

On meeting being resumed the chairman called for the votes of the delegates on the twine question. These were presented by C. Miller as follows:

U. G. G.—5

International—3

Moved and seconded that U.G.G. get car load of twine for these districts.

Moved C. Miller—P. Perry that committee be appointed one from each local, with power to add one from any other local to attend to the business of sending for twine. Carried.

Moved W. J. Harris—P. Manson that G. Gibb be committee for Airlie. Carried.

Moved that W. Petrie be committee be committee for Edinglassie. Carried.

Moved that C. Miller be committee for Prosperity. Carried.

Moved that L. Fahner be committee for Butze. Carried.

Moved C. Miller—G. Gibb that committee hold meeting. Special meeting adjourned.

CANADIAN EGG PRODUCTION

It is estimated that the production of farm eggs in Canada for 1924 was 212,648,685 dozen, valued at \$50,322,439, as compared with 202,186,508 dozen, valued at \$48,770,780 in 1923.

"BIGGER AND BETTER THAN EVER" THE 1925 EDMONTON STAMPEDE

"Bigger and Better than Ever" declared Manager W. J. Stark in discussing the forthcoming Edmonton Exhibition and Stampede which will be officially opened by His Excellency Baron Byng of Vimy, Governor General of Canada, and which will continue until July 18th.

Large increases in the prize money in the livestock and Agricultural Sections have been made this year; the dairy sections and poultry classes have also secured substantial increases in prize money.

The Stampede which this year is under the direction of Strawberry Red Wall who has gained an International reputation being one of the cowboys chosen to attend the Rodeo at Wembley last year. He has also been engaged by the Ringlan Brothers Circus in New York right up to the time of coming to Edmonton to manage the Stampede.

The management have secured practically all the most famous bucking horses in Alberta and the directors are confident that the contests, which will be for the World's Championship in all cowboy classes of sport, will be the best that have ever been staged in Alberta.

Auto races, horse racing, fireworks, wonderful mercantile exhibits and Federal Government exhibits will be other features of the exhibition. Last year the successful that the Management have again included this contest in the program and entries have been received from all over Alberta.

The Educational functions of the Exhibition are not being overlooked, and an exceptionally fine section, for which valuable prizes are being donated, comprised of Exhibits from local artists will form an outstanding feature of the exhibit in the Arts Building.

A \$70,000 Art Exhibit comprising pictures by all the old Masters is being brought from New York for display.

BUTTER EXPORTS

Exports of Western Canadian butter from Vancouver last year amounted to 1,804,142 pounds as follows: Japan 538,328 pounds; Chona, 289,070 pounds; Hong Kong, 20,536 pounds; Philippines 188,336 pounds; United Kingdom, 767,872 pounds.

HORSES INCREASING

Although there are 60,000 motor cars in Saskatchewan, the number of horses in the province is larger than ever and is steadily increasing.

Special price on rhubarb for canning at Saker's.

RIBSTONE WOMAN HAS HAIR SINGED BY FREAK STROKE OF LIGHTNING

The electrical storm which passed over this district Tuesday evening, June 23rd was responsible for a strange freak of action Mrs. F. B. Brewer was seated on the verandah at the time and a spark seems to have struck the left side of her head, singeing her hair and affecting her left arm. Mr. Brewer was but a few feet away at the moment and heard the spark strike his wife. They think it was a spark from the telephone cable but are not certain. Doubtless had the flash been a direct one Mrs. Brewer would have been killed instantaneously, but her experience was sufficiently thrilling with such a narrow margin of escape.

RATEPAYERS MEETING WILL BE HELD AT CHAUVIN ON SATURDAY

In response to a petition which has been presented to the council of the Municipal District of Ribstone a Special Meeting of the Ratepayers will be held in the Oddfellows Hall, Chauvin, on Saturday July 4th, commencing at two p.m.

A meeting of the council will be held in the morning commencing at 9 a.m.

CHAUVIN SCHOOL TRUSTEES MEETING

A special meeting of the Trustees of the Chauvin School District No. 2196, held at the office of the Secretary on Saturday, June 27th at seven o'clock p.m.

Present Mrs. Saul, Messrs Fahner and Pitman.

Sec. Treas: Application for the position of Secretary-Treasurer was read from H. N. Freeman, Mr. Fahner moved seconded by Mrs. Saul, that this application be accepted, and that the salary be \$200.00 per annum without any commissions. Carried unanimously.

Mr. Pitman moved that the Secretary be instructed to give the teachers thirty days notice as from June 30th, and to furnish references if required. seconded by Mr. Fahner. Carried.

Mr. Fahner moved, Mr. Saul seconded that Board advertise in the Edmonton Journal and the Chauvin Chronicle, for Two part-time teachers, Junior room for grades one to six inclusive. Senior room grades seven to ten inclusive, salary for Junior room \$1200.00; Senior room \$1400.00; state qualifications, school to open on August 24th 1925. Carried unanimously.

Mr. Fahner moved that telephone bills be paid. Carried.

Mr. Fahner moved that meeting adjourn. Carried.

AUCTION SALE OF

FARM PROPERTY

There will be offered for sale, by J. W. Stuart, Auctioneer, at the Post Office, at Irma, Alberta, at 10.00 o'clock a.m. on Thursday, the 9th day of July A.D. 1925, the following lands

Sestion Twenty-three (23) in Town ship Forty-six (46) in Range Eight (8) West of the 4th Meridian in the Province of Alberta and Dominion of Canada, containing Six Hundred and thirty-eight (638) acres more or less including the oil and gas rights but reserving unto the Canadian Pacific Railway Company all coal in or under the said land.

The Vendor is informed that the lands are situate about ten and one-half miles from Irma. About one hundred acres have been broken. The soil in general consists of good black loam with clay subsoil. It is slightly rolling with several sloughs and partly covered with willow and poplar brush. The land is all fenced and has a house 14 x 30 with lean-to 12 x 12, stable, 28 x 48 with shed 12 x 48; granary 15 x 15, and corral.

The property will be offered for sale at an upset price of \$8500.00 and the purchaser at the time of sale is to pay down a deposit of ten (10) per cent of the amount of his purchase price, and the balance of the purchase money to be paid within sixty (60) days from the date of sale, without interest, or in the alternative the balance of the purchase price shall be paid by the purchaser within sixty (60) days, executing a mortgage (the form of which is attached to the conditions of sale) for forty (40) per cent of the purchase price, and paying the balance thereof into Court without interest within the said 60 days.

The purchaser is to take the property subject to all assessments rates and taxes outstanding against it from and after the 31st day of December A.D. 1924 and in all other respects the terms and conditions of sale will be the standing conditions of the Court as approved by a judge.

Further particulars may be had from the Vendor's solicitors. Messrs. Byers & Heffernan, McLeod Building Edmonton, Alberta, or from the Auctioneer.

Dated, this 16th day of June, A. D. 1925.

"R. P. WALLACE,"

Clerk of the Supreme Court

Bees: How They Live And Work

Central Experimental Farm, Ottawa

By C. B. Gooderham, Dominion Apiarist

In the spring of the year a normal colony of bees consists of one queen and from twenty to twenty-five thousand worker bees. As the season advances and nectar and pollen are being gathered from willows, maples, dandelion and fruit bloom, the number of workers increase until there may be as many as one hundred thousand workers in one hive. As the colony increases in strength and prosperity during the spring and early summer, several hundreds of drones.

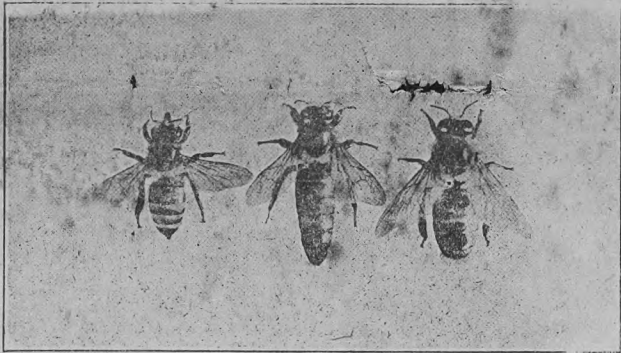

THE QUEEN BEE is the only fully developed female within the hive, and although she bears a royal title, she is by no means the ruler of the colony. Her sole duty is to lay eggs. She is the mother of every other bee within the colony. Early in the spring she commences to lay eggs in worker cells only. As the weather becomes warmer, the colony stronger, she increases her production until she may be producing as high as three thousand eggs per day, which equals about one and a half times her own weight. To do this she requires a large supply of highly nutritious food, and this is supplied her by attendant bees that constantly surround her as she moves about the combs performing her duty. The queen lays both fertile and infertile eggs, the former will produce either queen or worker bees, while the latter will only produce drones. The queen continues egg laying all summer, but, of course, not at the rate of 3,000 per day. In the fall of the year the daily rate diminishes considerably, and usually ceases altogether in October until the following spring. The queen is equipped with a sting, but seldom uses it, except on another queen. An unmated queen can also produce eggs, but only drones emerge from them.

THE WORKERS are undeveloped females, and, as their name indicates, they are born to a life of labour. Approximately the first fourteen days of their life are spent in performing the routine work of the hive: this consists of acting as nurse bees to the young larvae in the combs, attendants to the queen, house-cleaning, guarding the entrance of the hive, ventilating the hive and wax building. At the end of fourteen days, they graduate and become fielders, or gatherers of nectar and pollen. The life of the worker bees during the summer is only about six weeks. They soon wear themselves out with work. There is no thought of rest while supplies are available for gathering. They do not work for themselves, but for the organization and for posterity. The individual is merged in the republic, and their one thought is the accomplishment of the duty of the race. The worker bees are equipped with a sting, and it is this organ that usually comes first in the mind of the average person when thinking of bees. The sting is not a weapon of offence, but of defence, and is only used upon provocation; although perfectly innocent people may be stung something must have angered the bees beforehand. Worker bees, although, unable to mate, will lay eggs which, strange to say, will produce life, but only drones.

THE DRONES are the largest bees in the colony, and are the males. They are big noisy fellows, but perfectly harmless, as they do not carry stings. They play no part in the gathering of nectar or pollen because they are not equipped for this purpose. They are even unable to obtain their own living, existing altogether on the fruits of their sisters' labour, and even having the audacity to ask the sisters to feed them. Their only purpose in life is to ensure the continuity of the race by fertilizing the virgin queens. Once mating a queen, the object for which the drone exists is obtained and he dies immediately. The drones are tolerated in the hive while there is an abundance of supplies coming in from the fields, but as soon as this fails they are thrown out by the workers and left to die of hunger and exposure.

Having described the different bees in the hive, let us take a look inside the hive and see how things are managed there.

The queen deposits her eggs in cells built of wax: those intended for workers are in small hexagonal cells; those intended for drones are in cells similar to the worker cells, but a trifle larger, while those intended for queens are placed in cells of special construction. All the eggs hatch in three days into tiny white grubs which lie curled up in the base of the cells. These larvae have no other care in the world but an enormous appetite. Upon hatching they are immediately fed by the nurse bees. The larvae in the queen cells are abundantly supplied with a special food known as royal jelly. As they are being fed the cell is enlarged. They receive this food for five and a half days by the end of which time

they are full grown. The cells are then capped over for seven and a half days. During this seven and a half days the grubs transform into beautiful queens which emerge from the cells sixteen days after the egg was laid. The worker larvae are given special food for the first three days only, when they are weaned to a much humbler diet. It takes six days for these larvae to become full grown, and twenty-one days from the egg to the adult. The drone larvae receive little or none of the special food, but a humbler diet of pollen and honey. It takes twenty-four days for drones to mature from eggs.

WORKERS AND DRONES are constantly emerging in the hive from spring to fall, but queens are reared only three conditions: queenlessness, supersedure or swarming.

Should a colony lose its queen from any cause, and there are worker larvae of the right age present in the hive, the bees are able to produce a queen from then. This is not surprising when you remember that the eggs which produce queens and workers are identically the same, and that the young larvae of both are fed exactly the same for the first three days of life.

When a queen becomes old and failing in strength or injured so that she is unable to keep up the strength of the colony, the bees

BEES: HOW THEY LIVE AND WORK

(Continued from preceding page)

will rear a new queen to replace her. The old queen is allowed to remain in the hive until the new queen is mated and laying.

As the colony increases in strength and there is an abundance of supplies, the bees construct special queen cells, usually along the lower edges of the combs. Sometimes these cells may be found in depressions on the side or ends of the combs. The queen deposits eggs in these cells and as the larvae emerge the cells are elongated and the larvae given the royal jelly. As soon as the first of these cells are capped and the weather suitable the old queen and most of the working force "swarms out", leaving the old home, and all it contains to the coming generation. The swarm departs to establish a new home elsewhere.

The colony which the swarm issues is left with an abundance

of brood and stores and several young queens not yet emerged from their cells. The first of these queens will emerge on the seventh or eighth day after the swarm leaves. Should one of the queens emerge sufficient time ahead of any of her sisters she will, with the aid of the bees, tear down the queen cells and sting the occupants to death. If, however, several are ready to emerge at one time other swarms may issue, or a battle royal take place. The queen that is left will take her wedding flight about five days after she emerges from the cell, provided the weather is suitable. She meets the drone in the air, mates and returns to the hive fertilized for life, which may be anywhere from one to five years. The drone dies after the mating.

The building of the comb is done by worker bees only. Upon the underside of their body are eight special wax glands which are more active in young than old bees. These young bees first gorge themselves with honey and then cluster together in festoons. In about twenty-four hours small scales of wax will appear in the wax pockets. As they are produced the bees remove them with their pollen combs and transfer them to the mouth. The scales are then worked into paste with the mandibles or jaws, and when of the right consistency, the wax is added to the comb under construction. It is estimated that from ten to fifteen pounds of honey have to be consumed before one pound of wax is produced.

After graduating from the duties of the hive, the bees become gatherers of pollen and nectar. Pollen is used in the preparation of the larval food and is also necessary in the production of wax. When visiting flowers, the bee becomes dusted over with the pollen grains; it then hovers in the air and with the aid of its legs it cleans its body, finally bringing the pollen back to its hind legs, and with the aid of special combs and presses, it is packed in the pollen baskets and thus carried to the hive. As collectors of pollen, the bees incidentally perform another task beneficial to the human race. It is a well known fact that the flowers of most fruits and plants that produce seed require cross pollination before fruit or seed can set. The honey bee, visiting countless flowers during the season, is the most active agent in bringing about this cross pollination. Propolis or bee glue is also carried on the legs.

NECEAR is a thin, sugary solution secreted by certain glands of flowers. These glands are known as nectaries. Under favorable weather conditions, nectar is constantly being secreted while the flowers are in bloom. The bee visits the flowers and gathers this nectar with its tongue, which is a wonderfully constructed organ. The nectar is carried home to the hives in the sac of the bee. While in the oney sac certain digestive elements are added which start the work of inverting the sugar contained in the nectar. When the bees reach the hive the nectar is either deposited in the cell by them or passed on to other bees for them to place in the cells. Small quantities of nectar are placed in the cell at one time, as there is much water to be evaporated from it. The process of inversion and evaporation is continued in the hive until each cell is filled and the nectar fully ripened. When this stage is reached the full cells are capped over and now contain honey, the purest, healthiest and most delicious of food that should find a place in every home.

ALFALFA AND SWEET CLOVER HAY MAKING (Experimental Farms Note)

Two or three cuttings of hay per season are possible from alfalfa. To get three cuttings the first should be made as soon as the secondary shoots are noticeable on the crown of the plant, or when the plant is just coming into bloom. Experiments indicate that a greater tonnage per acre for the season can be obtained in Central Alberta if two cuttings only are taken and the first delayed until a little greater maturity develops. When handled in this way the second cutting is made about August 15th, and the alfalfa is able to make five or six inches growth for winter protection.

Alfalfa for hay should be allowed to only thoroughly wilt in the swath and then be raked up and cured in the coil. Fully curing in the swath or windrow results in a large loss of leaf.

The first cutting of sweet clover should be made when the crop is just coming into bloom. Delaying cutting past this stage of maturity reduces the yield of the second cutting, while the stems on the first cutting becomes too coarse and woody.

The first cutting should not be made too close to the ground as the second growth is developed from the buds on the base of the

stalks and not from buds which develop on the crown of the root, as is the case with alfalfa. For that reason cutting the first crop too close to the ground materially reduces the yield of the second cutting. Sweet clover hay may be handled in two ways. It may be cut with the binder and stooked like ordinary greenfeed, or handled like alfalfa hay. Cutting with the binder has several advantages. The sweet clover is tied in sheaves and there is no loss of leaf when the crop cures. The stubble is left a little higher with the result that the chance of getting a second cutting are greater in a favorable season than if the crop were cut with a mower.

The preacher was a young man and quite nervous, but interesting. He was making an eloquent plea for home life, and was descending eloquently on the evils of the club, telling his congregation that married men in particular should spend their evenings at home with their wives and children.

"Think, my friends," said he, of a poor neglected wife. All alone in a great dreary house, rocking the cradle of her sleeping babe with one foot and wiping away her tears with the other."

"There's one thing I don't like about this house," said Mrs. P. "and that's my husband!"

"WORTHY OF CONSIDERATION"

Copy of an Editorial in the Montreal Daily Star
Wednesday, June 10th 1925

Mr. Spencer, the Progressive member for Battle River, took up the cudgels on behalf of the savings banks in the House of Commons yesterday and he put up an argument of such practical common-sense that even the Minister of Finance deigned to admit that "it was worthy of consideration." Mr. Robb is looking round for the tidy little sum of \$164,000,000 to provide for maturing loans. The majority of these loans were made at a time when money was hard to get and commanded high rates of interest and Mr. Robb naturally hopes to effect a saving by floating new bonds bearing a lower rate, by the purchase of tax free Victory Bonds, or by such other methods as his financial advisers propose.

Mr. Spencer suggests that the present restrictions on depositors in the Post Office Savings Banks be removed and that a slightly higher rate of interest than that which at present prevails be paid. He thinks that in this way he will be able to kill two birds with one stone. He will not only tap that exceedingly rich vein of gold which represents the savings of the people, but he will also give the Minister of Finance an opportunity of effecting a national saving. The Government is now paying about 4.80 for the money it borrows. If the interest rate of the savings deposits was raised to 4 per cent there would still be a respectable margin of saving in the interest payable on Government loans.

The trouble with the Government Savings Banks in Canada is that they have been neglected. Thousands of persons in this country do not know of the advantages which they offer for small savings. Little publicity is given on the hoardings and through

other channels of propaganda to indicate the virtue of thrift or to show how easily it may be fostered through the use of the Post Office Savings Banks. A higher rate of interest, removal of vexing restrictions and a campaign of publicity from Halifax to Vancouver would be a benefit to the nation.

The other countries of the world have learned the value of the State Savings Banks and also what powerful institutions for economy and for the general good they can become. Canada with an especial need at this time both for national thrift and for the saving of every penny in the national exchequer, can well take a leaf out of their books.

LOCAL NOTES OF INTEREST

Another one of our old time bachelors has become a benedict.

D. W. Parcells had the misfortune to cut his hand rather severely last week. He was using the cheese cutter, and turning to greet a customer, he made a miss out with the knife.

An epidemic, which takes the form of a very severe cold, has taken hold of a large number of children of the district and some of the adults.

Lightning struck the chimney of the J. Craddock residence last Tuesday. No damage was done as the current reached ground safely by the stove pipes and stove.

Ogdens Tobacco—the most popular brand. 75c for 1-2 lb can, 15c for 1-12 lb at The Chauvin Pharmacy.

Mr. McAllister is paying a visit to his daughter Mrs. M. Parcells, of Chauvin.

Do not forget that there will be two picture shows on Sports day—Friday next—the first program commencing at six p.m.

"Never a Drum Was Heard." That's a real western picture, featuring 'Buck Jones,' to be shown at Chauvin on Sports Day. Show starts at 6 p.m.

Rev. P. F. MacSween has received word of the death of his brother Neil at Glasgow.

Fly-Tox gets rid of your flies quicker than seat. 50c for 8 ozs. 75c for 16 ozs. Large blower 50c. small blower free. The Chauvin Pharmacy.

Several heavy showers have fallen during the past week. The southern part of this district having been favored with the most precipitation.

Considerable damage has been done by hail in the Fram and Marsden districts. Stones as large as eggs are reported to have fallen.

Watch for the posters of the big Butzeville U.F.A. and School picnic at Salt Lake July 8th.

The Chauvin Schools are rejoicing at the end of the exams. and the summer term. No more school until August 24th.

George Reynolds had his motor boat out at Salt Lake Sunday afternoon.

Want a pair of good pants? Saker's have a nice range for work or dress.

The next meeting of the Edin Lassie U. F. A. will be held on Thursday July 9th.

Chauvin Sports day will be held Friday, July 3rd.

Among the visitors to Chauvin last Saturday were Mr. and Mrs. L. Moffatt of Ridgeclough.

Mr. and Mrs. K. O. Bratvold have returned from the Norse Centennial celebrations, and report having had one of the best times of their life.

The Chauvin U. G. G. elevator will be closed from evening the of June 30th to the morning of July 16th, for stocktaking and to allow D. Bissett a short vacation

The next meeting of the Manitou Lake council will be held at Marsden, Monday, July 6th 1925.

The Bawlf Co. elevator, Ribstone will be closed June 30th. Mr. Robinson is taking a short holiday and expects to open the elevator in about a month.

Ice cream is wonderfully refreshing and wholesome. When next in town call in at G. M. Beattie's parlor and try a dish.

The next regular meeting of the Ribstone W. I. will be held Friday, July 3rd.

SHERLOCK LAKE SCHOOL DISTRICT

Opening of the New School

The new school erected by the Waterman Waterbury Company, was formerly opened by a social evening and dance, under the auspices of the Sherlock Ladies Club. A splendid crowd gathered and on every hand keen appreciation was expressed on the handsome structure erected for the Educational (and social) activities of the district. It was pleasing to see so many friends present from the surrounding districts — Brady, Stanmore, Fram and even Marsden being represented, while both Airlie and Prosperity sent their quota, and if Friday evening is to be taken as a criterion then the success of the school is assured. Dancing indulged in until nearly midnight, when the delectable pies, provided by the ladies of the club were sold by auction. The prices realized from 60c. to \$1.00 each, and the sum of \$14.75 was raised by this means. The supper waltz followed and a real fine repast was then partaken of by the hungry guests. The sum realized by the sale of cushion tickets amounted to over \$20.00. Geo. Masson then asked the chairman of the board (Mr. Alan Marshall) to say a few words. Mr.

MUNICIPAL DISTRICT OF RIBSTONE, No. 421

NOTICE

Notice is hereby given that if all Arrears of Taxes imposed in 1924 in respect to any parcel of land situated in this Municipality and not paid on or before July 1st next, such land will be dealt with under the provisions of the Tax Recovery Act of 1922, with a view of obtaining Certificate of Title in the name of the Municipality in respect of such parcel of land.

E. McCLUSKEY,
Secretary-Treasurer
Chauvin, Alberta

RURAL MUNICIPALITY OF MANITOU LAKE NO. 442

ASSESSOR WANTED

Tenders will be received by the undersigned until the evening of the 3rd day of July next for the position of assessor for the Rural Municipality of Manitou Lake No. 442. The assessment is to be done by view and the acreage to cover is about 164,000 acres. The work is to be done during this year in preparation for 1926. Applicants to state qualifications and salary expected to complete the assessment. Applicant to furnish his own conveyance.

The lowest or any tender not necessarily accepted.

J. BRADLEY,
Sec'y-Treas. R. M. No. 442
Marsden, Sask

VILLAGE OF CHAUVIN

NOTICE

Notice is hereby given that if all Arrears of Taxes imposed in 1924 in respect of any parcel of land situated in the Village of Chauvin and not paid on or before July 1st next, such land will be dealt with under the provisions of the Tax Recovery Act of 1922, with a view of obtaining Certificate of Title in the name of the Municipality in respect of such parcel of land.

H. N. FREEMAN,
Secretary-Treasurer
Chauvin, Alberta

Marshall extended a very hearty welcome to all, and particularly stressed the fact of the district's indebtedness to the neighbouring school boards of Brady and Stanmore in attending to the needs of their children of school age until they could erect a school of their own. This had now been accomplished, and he hoped that they could now take their own full responsibility in this connection. In responding for the visitors Mr. James W. Coe congratulated the ratepayers on their beautiful school, and his hopes venture. Dancing was resumed, and during a lull Mr. Ralph Knutson entertained the audience vocally and had to respond to an enthusiastic encore. Mr. Walter Deans ably recited one of Robert Services' classics, and Mr. Garfield Lawson was in his best form with the first "step" on the plauded. Dancing then continued until the early hours of the morning when the great crowd, gradually melted away seeking rest and repose after their strenuous efforts. In conclusion one cannot forget the services rendered by towards the success of the evening. Mr. George Masson was here there and everywhere in his usual desire to keep thing on. The three "Ms" (Chris. Mathieson, Harold Matson and Pete Martin) furnished "real class" music. Mr. S. R. Swindell was a capable auctioneer and door keeper. One must pay a special tribute to the Ladies Club who were responsible for the placing of the organ in the school. By their efforts at least one half of the indebtedness will be met, as the figures, at present available, show that about \$80.00 was cleared, after expenses were paid. This is a splendid start for the new Ladies club, and augers well for the future.

BANK OF MONTREAL OFFICIAL CROP REPORT

General Crop conditions are favorable throughout the Prairie provinces. Following rains which however, in some districts have been excessive. Reports of damage by cutworms are more or less general and some reseeded is necessary. In Quebec alternate rains and hot weather have provided excellent growing conditions. In Ontario warm weather has been general for the past two weeks and fall wheat is heading out. In the Maritime Provinces there are good prospects for all crops; while in British Columbia growth of all crops except fruits has been normal under satisfactory weather conditions.

Edmonton District: Rains general, prospects excellent. Growth further advanced than average; slight damage by worms and wind in the eastern section.

Calgary District: Rains general. Further damage middle and north-eastern section from worms now checked. Damaged fields generally have been reseeded. Growth rapid.

Lethbridge District: Unusually heavy rains and prospects excellent; growth retarded by cool weather.

Northern Saskatchewan: Seeding of all grains completed. Land thoroughly saturated from recent rains, and with warmer weather crops are progressing satisfactorily. Cutworms more numerous than in previous years, causing some damage to early grains and in scattered territories

reseeding has been necessary. Pastures in good shape. Favorable outlook in many districts that suffered a short crop last year.

Southern Saskatchewan: All grain seeded. Crops advancing rapidly as a result of favorable weather and general rains. Some damage reported from cutworms. Good growth in pastures. General conditions favorable.

Manitoba District: General conditions favorable, though damage reported from cutworms. Excessive moisture and floods in some districts where reseeded may still be done; growth retarded by cool wet weather, but wheat well stood and rooted. Rye heading out.

British Columbia: Indications point to average yields in all principal crops except fruits; oats and wheat are looking well, hay crop generally good; roots vegetables satisfactory; potatoes 60 to 65 per cent of average cherries 25 per cent, plums and prunes 35 per cent, apricots, peaches and pears a failure, strawberries 50 per cent, raspberries 80 per cent. Pasturage good.

MASSON V HALLS

The case which has caused considerable interest in the district and in which judgement was given for Mr. George Masson in the sum of \$85.00 by J. W. Coe, J.P., was appealed to the District Court. We now learn that at the last moment the appeal was withdrawn and the sum in question, together with costs, was paid in settlement of the case.

WEDDING BELLS

SNELL—SCANTLON

At half past five at Our Lady of Lourdes the marriage was quietly celebrated by Rev. Father Webster on Saturday afternoon of Annie Mary, Daughter of the late Mr. and Mrs. James Scantlon, of Lucan county Dublin, Ireland, to Mr. John Snell, son of Mr. George Snell and the late Mrs. Snell of Chauvin, Alta. The bride who was given away by Mr. R. H. Greene, wore royal blue cut velvet and cable with picture hat and carried a white prayer book. She also wore a string of pearls, the gift of the groom. The bride was assisted by Mrs. R. H. Greene who held a reception for her at her home, at which some 75 guests were present. The groom was supported by his cousin Mr. Herbert A. Snell. For her honeymoon trip to the West via the Great Lakes, the bride wore a navy blue Canton crepe costume with beige hat.

Order your raspberries and apricots now at Saker's. You get the lowest price and you get the best quality.

CHAUVIN & BATTLE RIVER TELEPHONE COMPANY

TENDERS

Tenders will be received until July 11th by the undersigned for rebuilding telephone line from Chauvin north. Plans and specifications can be obtained from secretary. Tenders to give price per mile. Twenty foot poles will be supplied and delivered to line by the company.

C. TUFTE, Chauvin, P. O.

MUNICIPAL DISTRICT OF RIBSTONE NO. 421

Notice of Ratepayers' Meeting

A Public Meeting of the Ratepayers of the Municipal District of Ribstone, No. 421, will be held in the Oddfellow's Hall, Chauvin, commencing at Two o'clock, Saturday July 4th

MORTGAGE SALE OF FARM PROPERTY

There will be offered for sale by Public Auction at Reynold's Barn, Chauvin, Alberta, at 2 p.m. on Saturday, 18th of July, 1925 S.W. 1/4 Sec. 20, Tp. 41, R. 1, W. 4th M., excepting mines and minerals.

Terms: 10 per cent cash at the time of the sale and the balance according to conditions to be made known at the time of the sale, or upon application to the Vendor's Solicitors.

The sale is subject to a sealed reserved bid and free of all encumbrances, except taxes for the current year, and subject to the right of the vendor to the current year's crop.

The Vendor is informed that the above property is situated about 15 miles from the railway and 2 1/2 miles from school and contains 160 acres, more or less, of which 40 acres have been cultivated, that there is erected thereon a log shack, that it is fenced on 3 sides and that the water supply is a well.

For further particulars and conditions of sale, apply to McDonald, Weaver & Steer, Vendor's Solicitors, Edmonton, Alberta.

Approved: "A. T. Kinnard,"
Deputy Registrar.

ALBERTA WHEAT POOL

There are now 32,000 farmers in the Alberta Wheat Pool, according to a statement made by a director of the pool. Pools for marketing dairy, livestock and poultry products are now being organized.

CHANCE VS. GEOLOGY

It's a fenny thing—this bringing in oil fields. And then again, it isn't so funny for some folks. But, humorous or not there's some queer tricks of fate been played to uncover or hide old Dame Nature's oil cellars.

For instance, they claim that some states have given birth to an oil field because of the kick of some mule's heels, or on account of a broken down wagon, which altered the drilling location to the scene of the accident instead of the intended site. Other times it has been somebody's mistake which turned out rosily for everybody. You never can tell.

Take Oklahoma. That state has more oil fields than Michigan has lakes. And down around Healdton they tell a good one to account for that field. It is said to be true, too.

A Mr. Franklin, it seems, had receipts for a pretty fair proportion of that state in that locality and was running cattle on it. Like a lot of other good men he got an undying hunch that "there was oil in them hills." He backed it up by agreeing to pay a man for drilling down to it—right in the centre of one of his big tracts.

The drillers packed up their paraphernalia and set out for the spot he had picked. They discovered it was away off the main road and up on a hill, both of which were inimical to convenience and comfort. If they went there they would have to cut fences and repair them behind them, cut through brush and timber and make

a road to the top of the hill.

So they thought twice and counted ten before they acted. All the land in sight belonged to Franklin, so why not spud in at some more reasonable site, some place where it would be easier to haul water to, and where water could be got. A driller, you know, thinks in a straight line, just as he drills.

Wherefore they proceeded north along the road some six miles. There they found a place where the rig could be hauled easily. And across the road was a small stream. Nor did it need a U.S. topographer to tell them that the ground was more level.

Lo! They set up their outfit and drilled in a well. It was the first well in what has since been called the Healdton field.

Here's the curious part of the whole episode. It is where "Chance" got in her work. It has since been proved that the original site chosen for the first well, and abandoned by the drillers is in dry territory.

No oil will ever be found there, for a fault cuts off the west side of the Healdton pool in an almost perfectly straight line, running from south east to the northwest. This faulty condition is peculiar to that country and is found to cut off the west side of the Graham and Hewett pools also.

AMENDMENTS TO AID
POOLS VOTED DOWN

The commons wrestled for four hours over grain receipts Wednesday, June 24th in discussing the new Grain act. Three or four amendments were submitted which would have given farmers the right to specify to what terminal elevators their grain should be sent. These were chiefly for the benefit of members of the western grain pools. Opponents to the proposal, who included Robert Forke, Progressive leader and Hon T. A. Crerar, former Progressive leader, took the ground that this would be a one-sided arrangement and that country elevators who are compelled to accept grain when offered would have no right to say how it should be handled. The question of the elevators' liability for grade and dockage also was involved.

BIG PARTY OF EDITORS
COMING IN SEPTEMBER

Word has been received that the American Agricultural Editors Association, including representatives of one hundred of the largest farm journals in the United States, will visit Alberta in September, and will spend a day in Edmonton, and will also visit other points in the province. This party represents journals with a combined circulation of more than eight million copies.

DEATH OF ALBERTA
LABOR MEMBER

The death of W. G. Johnston, labor member for Medicine Hat expired last week. Mr. Johnston was one of the most popular members of the house. A bye-election to fill the vacancy caused by his death will be held within the time specified by the new election act.

WORLD POPULATION

The population of the world at the beginning of the nineteenth century was estimated at 700 millions. It is now about 1,660 millions, having more than doubled itself in 120 years.

PROVIDE LOW RATES
FOR HARVESTERS FROM
BRITISH COLUMBIA

Labor department officials are arranging for low railway fares to British Columbia harvesters coming to the prairies this fall.

SCHOOL PICNIC AND POOL
MEETING AT RIBSTONE

A joint picnic of the Old and New Ribstone schools was held last Friday afternoon, there being well over one hundred in attendance. The children had a first class time and enjoyed themselves thoroughly. Toasting weiners at supper time also contributed no small share of merriment. The ladies had a very busy time preparing lunches, and their efforts were keenly relished by the children who had developed enormous appetites.

During the afternoon J. Russell Love, M.L.A., addressed the adults on behalf of the joint pool campaign and received an attentive and appreciative hearing with the result that a larger number of contracts were signed up.

It was decided to continue the campaign thoroughly, and with this end in view a committee of ladies and another of gentlemen were appointed. Mrs. H. S. Burton; Mrs. John Dallyn; Mrs. F. Brewer; Mrs. A. Ruf being appointed; whilst John Dallyn; J. R. Beckley and H. Maib were appointed as the men's committee. Mr. H. S. Burton being appointed to act as secretary.

After supper a program of sports was carried through very successfully; and a dance by the basket ball girls brought the day's proceedings to an enjoyable termination.

RURAL CREDITS BILL IS
KILLED IN THE SENATE

The senate has passed a motion that the rural credits bill as passed by the commons "be not proceeded with during the present session."

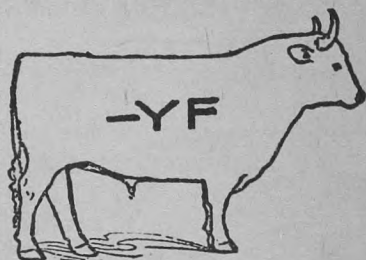

The motion, which was made by Sir James Loughheed, was unanimously adopted.

Several senators speaking on the bill expressed sympathy with the principle but felt that due consideration could not possibly be given to a measure of such importance in the few remaining hours of the session.

Sir James Loughheed in making his motion, suggested that the two reports of Dr. Tory be distributed among the members of the senate in order that they might become familiar with the subject before the next session of parliament. The bill was to authorize the dominion government to loan \$10,000,000 to the province.

**NEW GRAIN ACT
PERMITS MIXING
IN ELEVATORS**

A clause in the new Grain Act, authorizing the mixing of grain in terminal elevators was adopted by the agricultural committee of the house on the afternoon of Tuesday, June 16th. There was four hours discussion on the clause. Opposition to mixing in any form was led by J. Evans, of Saskatoon, and Thomas Sales of Salteoats. Hon. W. R. Motherwell would have given the elevators two years' notice that mixing must be abolished but this proposal was voted down. Some minor amendments were made in the wording of the clause but eventually it carried. There was no division on the actual adoption of the clause.

A SMILE

A single thought of kindness,
And one single word of cheer
Do more to help a man along
Than preaching for a year.^{1/4}

A single act of friendliness,
A handshake, firm and true,
Do more to help a lame dog on
Than most advice will do.

But just one word of sympathy,
With just one sunny smile,
Will make a fellow square his
jaw—
And things seem worth his
while.

Dad was ill, and mother was busy sterilizing dishes which had come from the sick-room.

"Why do you do that?" asked four year old Donald.

"Because, dear, poor daddy has germs, and the germs get on the dishes. I boil the dishes and that kills the germs."

Donald turned this over in his mind for several minutes, then: "Mother, why don't you boil daddy?"

She: "I think long hair makes a man look intelligent."

He: "Not always. If my wife finds a long hair on my coat it makes me look like an idiot."

Here and There

The entire Province of Prince Edward Island and adjacent islands have been leased for oil prospecting purposes to Henry L. Doherty & Company, according to an announcement by the concern. The lease has been taken on option.

Indications are that 1925 will be one of the best tourist seasons ever experienced by Montreal. It is estimated that 750,000 people from all over the continent visited Montreal last year, while this year the number is placed at a million.

It is understood that a contract has been let for the laying of a submarine cable from Vancouver Island to Suva, Fiji Islands, by the Pacific Cable Board. This is part of the "All-red" cable and wireless route which is being established between British possessions the world over.

In order to facilitate the work of the air force patrol radio stations are being erected at the Pas, Norway House, Victoria Beach, and Fort Osborne Barracks, Winnipeg. The stations will be completed shortly and will have, it is stated, a radius of communication all over Canada.

"Judging from the amount of sound business activity noticeable here, British Columbia is launching into an era of constructive development which augurs well for her future prosperity," comments Grant Hall, Vice-President of the Canadian Pacific Railway, who recently spent ten days on the Pacific Coast.

"So long as the Canadian Pacific Railway has a dollar left in its treasury, it will fight for the ideals, uphold the faith and maintain the precious heritage of confederation," said E. W. Beatty, Chairman and President of the Canadian Pacific Railway, when addressing the Canadian Manufacturers' Association at their annual convention held at Hamilton recently.

Eleven hundred pounds of speckled trout, gray trout and pike were the trophies taken back to New York recently by seven members of the Caughnawaga Hunting and Fishing Club, private preserves near Montreal, after a two-week stay on the fishing grounds. The catch included a 19-lb. gray trout and the average weight worked out at around eight pounds.

Frank W. Ashby, secretary of the Australian Manufacturers' Association, visiting here recently, said the impression in Australia was that Canada was the back door to the North Pole. People in the Antipodes think that Herschell Island and Baffin's Bay are linked up municipally with Montreal and Winnipeg, he said. He was surprised to find the Dominion had a delightful climate and cities more modern than those in Australia.

What is stated to be the biggest log jam in sixty years recently occurred on the Montreal River in a gorge through which the river flows into Lake Temiskaming. 300,000 logs were piled up to a height of 80 feet with a width of 250 yards, choking the river for 300 yards down at the point where the jam took place. An army of 100 men, working night and day for three days, at last succeeded in breaking the jam with dynamite.

A three-week tour of Canada by teachers and their friends, under the auspices of Dean S. Laird, of MacDonald College, will leave Toronto July 20 on the Canadian Pacific Railway. The party will travel by train to Vancouver and Victoria, and will return by way of Southern British Columbia, across the northern end of the Prairie Provinces and by boat from Fort William east. Stops will be made at all the principal points of interest.

EXCURSIONS

MAY 15th to SEPTEMBER 30th Final Return OCT. 31, 1925

EASTERN CANADA

The Eastern Canada tour includes an optional route arrangement—via all rail or rail and lake VISIT

THE MARITIME PROVINCES**

A cruise on the Great Lakes from Port Arthur, Fort William and Duluth is one of the most enjoyable experiences that can be imagined. The majestic ships (S.S. "Noronic," "Hamonic," "Huronie") of the Northern Navigation Company form the water connection of what is known as the Canadian National Lake and Rail Route to the East.

ST. JOHN BAPTIST CELEBRATION AT CHAUVIN
WAS GREAT SUCCESS

The St. John Baptist celebration at the Sacred Heart Church, Chauvin, Wednesday June 24th, was well attended and a most enjoyable time was spent by all present. It was in fact one of the most successful of a long series of these annual events.

Proceeding began by the celebration of High Mass in the church after which, at noon, all partook of the bean dinner which was served. During the afternoon a full program of athletic events for young and old was carried through with great success, there being very keen competition in the majority of the contests.

A baseball game between the Chauvin Canadians and Airlie was a big feature of the sports. This was an interesting game, which resulted in a victory for the home team on a 17-6 score.

The day was brought to a close by an entertainment in the basement of the church. The program included a duet by Miss Jeanette St. Pierre and Miss Yvonne Poirier; two songs by Mr. Leonard Price; song by Mr. Oscar Meurin; Play entitled "Un Marie Pour 30 centimes" presented by Mr. Robert Delamont and Mr. E. Fontaine and another play entitled "Le Beau-Frère a Papa," presented by Rev. Bro. Berge; Mr. R. Delamont and Mr. D. St. Jean.

The winner of the raffle was Mrs. J. B. Girard.

AIRLIE NEWS

The special U.F.A. meeting at Airlie was well attended, there being representatives from four different locals present, also representatives from four different twine companies. Some good discussions on twine was heard. The prices on the different companies were exactly the same, showing that they are in together on this and that there is no opposition on twine at all. It should show the farmers that to co-operate pays, and to stick together and keep their U.F.A. in good standing; and to order all their goods by quantities. The savings that this local has made on gopher poison and twine has more than paid for their U.F.A. dues and I am glad to say that this local stocks together very good, having U.F.A. meeting once or twice a month.

We are glad to see Mrs. Frank Cargill home again and looking fine.

Reports from Minnesota and Dakota are lots of rain and some places crops are washed out. We are getting our share of rain this summer.

Sanitary Fly Coils—The worlds best fly catchers—12 for 25c at Soker's.

Don't forget the next U.F.A. meeting on Friday, June 26th at 8 o'clock. Everybody turn out.

Ball practice every Wednesday night.

Yardley's Soap is different. 35c a cake at The Chauvin Pharmacy

The hard part of being poor is trying to save while spending as much as the rich do.

EDGERTON DRAMATIC SOCIETY PRESENT GOOD COMEDY AT CHAUVIN

The Edgerton Dramaic Society presented a play entitled "Mrs. Temple's Telegram" in the Odd-fellow's Hall, Chauvin, last Friday evening. The theme of the comedy was woven around a quotation from Sir Walter Scott 'Oh, what a tangled web we weave when first we practice to deceive.' The scene is set in a London residence. The development of the story brought many humorous episodes. Each act a full share of these and produced many a round of hearty laughter from the audience.

The cast was as follows:—

Jack Temple — W. Spornitz
Frank Fuller — J. W. Kennedy
Captain Sharpe — N. Davidson
Wigson — H. C. Boyd
John Brown — H. Spornitz
Mrs. J. Temple — Miss B. Wheeler
Dorothy — Miss N. Compton
Mrs. F. Fuller — Mrs. E. Spornitz
Mrs. Brown — Mrs. H. Spornitz
Director, Mrs. E. F. Clendenan

Each and every one of these ladies and gentlemen are to be congratulated upon the skill with which they presented their parts—they have developed a high standard of the dramatic art.

The scenery brought along by the company was excellent, and with the music gave the finishing touch to the whole.

Following came a popular dance at which the music was supplied by members of the Edgerton Orchestra. This was well attended and greatly enjoyed by all present.

RIBSTONE W. I.

A Womans Institute Representative meeting of the Wainwright Constituency was held inmediately after the regular monthly meeting. Mrs. M. McCrear convener in the chair, Mrs. John Dallyn Convener's secretary and representative for Ribstone, Miss Royce, Ribstone, Mrs. Tranmer, representative for Edgerton and Mrs. Milne, Edgerton were in attendance. The program for the constituency convention was discussed and plans are now being arranged for same. We hope to hold convention early in September at Wainwright exact date will be duly advertised.

OIL REFINERY

FOR EDMONTON

A new oil refinery, the third to be established in Alberta, will be opened at Edmonton shortly by the Alberta Refineries, Ltd.

MERTON, No. 451

NOTICE

Notice is hereby given that if all Arrears of Taxes imposed in 1924 in respect to any parcel of land situated in this Municipality and not paid on or before July 1st next, such land will be dealt with under the provisions of the Tax Recovery Act of 1922, with a view of obtaining Certificate of Title in the name of the Municipality in respect of such parcel of land.

L. B. NICHOLSON,
Secretary-Treasurer
Dina, Alberta

SUPPLEMENTARY
CROP REPORT

Issued by the Dept. of Agriculture,
Edmonton, June 23, 1925.

Further information respecting crop conditions with relation to the activity of cutworms and other pests in the province, received by the Department of Agriculture since the issuance of the periodical crop report last week, indicates that several large areas in the east central portion of the province have suffered rather severely from the operations of the cutworm and wireworm. This information has been made available as a result of a survey just completed on behalf of the Department.

In some districts it is indicated that the wheat yield will be less than 40 per cent. normal, and it has been necessary in these districts to re-seed with other crops, thus reducing the general acreage in wheat. Districts in the extreme south and south-eastern part of the province have also been affected by the worms.

The fact that large areas in these portions of the province have suffered from the pests, and the fact also that considerable wheat-growing area in the south-eastern district has been abandoned by farmers removed to other areas, makes it evident that the general increase in wheat acreage in the province is much smaller than would ordinarily have been the case.

CO-OPERATIVE POOL DRIVE

The drive for memberships for the dairy, livestock and poultry pools in the province is now underway. In this connection three visited the province the past week in the persons of Walton Petet, the general secretary of the national council of co-operatives of the United States; W. J. Park, and Mr. Mercer, general manager and secretary respectively of the Fraser Valley co-operative milk producers association. These men addressed meetings at various points in the province. The drive for memberships in the three pools is making good progress.

Here and There

The popularity of the Nova Scotia apple is rapidly growing in Europe. 1,103,980 barrels and 8,693 boxes were shipped in 1924-25 to ports in England, Scotland and Germany. Shipments also went to Newfoundland, West Indies, Central Canada and the United States.

Production of sugar beets in Canada during 1923 amounted to 159,200 tons, valued at \$1,922,668, and grown on 17,941 acres, according to the Bureau of Statistics. 6,000 acres have been planted to beets this year in Southern Alberta, due to the establishment of a sugar beet factory.

Milton Sills, the well-known movie actor, with a company of 32 other screen artists, passed through Montreal recently to take scenes in "The Come Back" in which he is featured. The party went to Beauchesne, in Northern Quebec. Travelling by another train was a mother skunk and five kitten skunks which will also figure in the picture.

The 286 passengers on the Canadian Pacific S.S. Empress of France completed their 30,000-mile tour of the world on Saturday, May 23, when the vessel docked at New York. At their last stop at Havana, President Machado of Cuba invited the passengers to attend his official inauguration and to witness the unveiling of a statue to the preceding President.

Another aristocratic rancher recently passed through Montreal on a return visit to the ancestral estates in Transylvania, Hungary. This was Baron Josef Csavessy who, with his brother Andre, took over a 1,600-acre ranch last March near Cochrane, Alberta, on the Bow River. Incidentally the Baron was a passenger on the Trans-Canada on its first return trip of the season from Vancouver.

The Indian Day Celebration at Banff, it is announced, will take place as usual this year on the third Thursday and Friday in July. Preparations are already under way for this event, which enjoys an enviable population as an Indian show. The Stoney Indians arrive in large numbers from their reservation to take part in the ceremonies, which are the 23rd annual celebration of the function.

The annual invasion of Canada by anglers from the United States has commenced. F. N. Peet, secretary of the Izaak Walton League of Chicago, with other members of the League is catching salmon at Cains River, N.B., while a party of prominent newspapermen from New York is at Lake Archambault, in the Laurentians, in quest of the elusive trout. Mr. Peet holds the world championship for casting a fly.

Walter Lindley-Jones, editor and founder of the Mercantile Guardian, of London, Eng., and an authority upon commercial matters in general, recently passed through Canada on the last lap of a journey around the world, by Canadian Pacific steamships and trains. Mr. Lindley-Jones states that a terrific boom is due in China as soon as hostilities cease there and that Great Britain and Canada will be the chief beneficiaries.

A man reached the station platform just as the 5.15 was pulling out. A little burst of speed netted him fifty feet in overcoming the train's handicap, but the best he could do thereafter was to run a losing race. He quit at the end of the long platform and returned. "Miss your train, sir?" enquired the porter cheerfully. "No, my friend," he replied, "Oh, no! I was just chasing it out of the yard. You oughtn't to allow it around here. Don't you see the tracks it has left?"—From "Rail Life," by Alfred Price.
